THE PROJECT OF BEYOND THINKING

"It never goes down."

WWW.IN-OUT.LIVE

Smart Contract

A **smart contract** is a self-executing program stored on the blockchain. It automatically carries out actions when predefined conditions are met, without needing a middleman.

How it works

1. Two parties agree on terms (e.g., "If I send 1 POL, you send me a product").
2. The smart contract is deployed on the blockchain.
3. Once the conditions are met, the contract executes automatically.

◆ **Key Features:**

✓ **Automation** – No need for intermediaries.

✓ **Trustless** – Transactions happen without needing to trust the other party.

✓ **Efficiency** – Reduces time and cost in agreements.

What is Blockchain?

Polygon Blockchain is a decentralized, distributed digital ledger that records transactions securely and transparently across multiple computers. Instead of relying on a central authority (like a bank), blockchain operates through a network of nodes that verify and store transactions in blocks

◆ **Key Features:**

✓ **Decentralized** – No single entity controls it.

✓ **Immutable** – Once recorded, data cannot be altered.

✓ **Transparent** – All transactions are visible to participants.

✓ **Secure** – Uses cryptography to ensure safety.

About IN-OUT

The **INOUT** project can be designed around a simple yet powerful economic principle: **Flow of Value In (IN) and Flow of Value Out (OUT).** The core idea is to create a continuous cycle of buying, selling, and reinvesting to generate sustainable growth and profits. Here's how it works

IN (Input of Funds)

•**Buying Phase:** Users invest funds (DAI, tokens, etc.) into the system. This can be through staking, purchasing tokens, or providing liquidity.

•**Capital Pool:** The funds collected are pooled together to create strong liquidity, which is the backbone of any economic system.

•**Diversified Allocation:** Part of the funds is allocated for high-yield activities like arbitrage, DeFi protocols, trading bots, or staking to generate returns

OUT (Output of Returns)

•**Profit Distribution:** The profits generated from the investments are distributed back to participants.

•**Token Buybacks:** To maintain value, the system can buy back its own tokens from the market, reducing supply and increasing demand.

•**Reinvestment Option:** Users can choose to reinvest their profits to compound earnings, keeping the IN-OUT cycle active.

IN-OUT Concept

In-out

Simple Concept of In and Out

IN (Invest/Deposit):

This represents the flow of funds or resources into the system. It could be investments, deposits, or participation in projects like staking, gaming, trading, or providing liquidity

This is the flow of returns or benefits out of the system. It includes profits, rewards, earnings from arbitrage, withdrawals, or value gained from utility and growth.

OUT (Withdrawal)

Grow Fund Economically

- **Transaction Flow:** Every buy (IN) and sell (OUT) transaction generates small fees that go back into the system as revenue.

- **Arbitrage Opportunities:** Using price differences across platforms to buy low and sell high, creating risk-free profits.

- **Deflationary Mechanism:** Burning a percentage of tokens with every transaction to increase scarcity and value.

IN-OUT Cycle

- **Funds IN:** Users invest.

- **Capital Utilization:** Funds are actively used to generate profits.

- **Profits OUT:** Users receive profits, boosting trust and attracting more investments.

- **Reinvestment IN:** Profits are reinvested for compounding growth.

INOUT Token Algorithm

Why This Matters?

- **Liquidity Growth:** Every transaction strengthens the liquidity pool.
- **Inflation Control:** Token burning and liquidity deposits ensure sustainable growth.
- **Value Appreciation:** The mechanism is designed to create **constant upward pressure** on the token's price.
- **Total Supply :** Is depending on user minting.

INOUT — Designed for Growth.
Powered by You.

| Buy INOUT |
|---|
| • You'll receive **INOUT tokens at 95%** of the current market rate.
• The remaining **5%** will be deposited into the **Liquidity Pool** to **boost the token's value** and manage inflation effectively. |

Sell INOUT
• **100% of the INOUT tokens** will be **burned** based on the current rate, reducing the total supply. • You'll receive **90% of the sale amount**, while the remaining **10%** will be added to the **Liquidity Pool** to help **increase token value** over time.

Opportunity Plan

In→out

1 Referral Bonus

2 Level Bonus

3 Team Growth

4 Leader Bonus

5 Development Bonus

Easy to Join Us

Deposits start at $10 and are in multiples of $10, with no maximum deposit limit.

Starter:

You get 0.5% per day for 15 days on all your deposits.

Power:

If you deposit an amount equal to or less than the deposits of two direct referrals, you will receive 1.0% per day on that deposit for 15 days.

Note: After the 15-day cycle is over, deposit orders are marked **inactive**. Only **active orders** are counted towards your return on investment portfolio **potential 3x** of all active orders. If your last order is inactive, you will be considered **inactive**.

Level Qualification

Achieve the coveted Level rank and enjoy the many benefits INOUT has to offer.

TOTAL TEAM - STRONG LEG = OTHER LEG

Rank Name	Level Open	Direct Criteria	Conditions
STARTER	1		
SILVER	5	5 Direct	500$ Deposit in Direct
GOLD	10	10 Direct	50 Team other Leg
PLATINUM	21	20 Direct	200 Team other Leg
DIAMOND	-	20 Direct	300 Team other Leg
BLACK DIAMOND	-	20 Direct	1000 Team other Leg

Affiliation Bonus

Grow faster with force! **10 levels** open for **15 days**

LEVEL	BONUS
Direct	2.5%
2	1%
3-5	0.5%
6-8	0.25%
9-11	0.15%
12-17	0.10%
18-20	0.15%
21	0.25%

- You will receive a **direct bonus** based on **your deposit**.
- If your **limit reaches zero**, you will be **marked inactive**, and all bonuses will **lapse.**

Team Growth

As per the level you have achieved, the **Team Growth Bonus** will continuously accumulate in the **Team Growth Wallet** and will be released **daily at 0.5%.** If your limit reaches zero, your releasing bonus will lapse.

LEVEL	BONUS
1	40%
2	15%
3	10%
4-10	5%

Unlock Your Power – Instant Cash in Hand: Get a 10% Team Growth Bonus when you deposit into a **new wallet!**
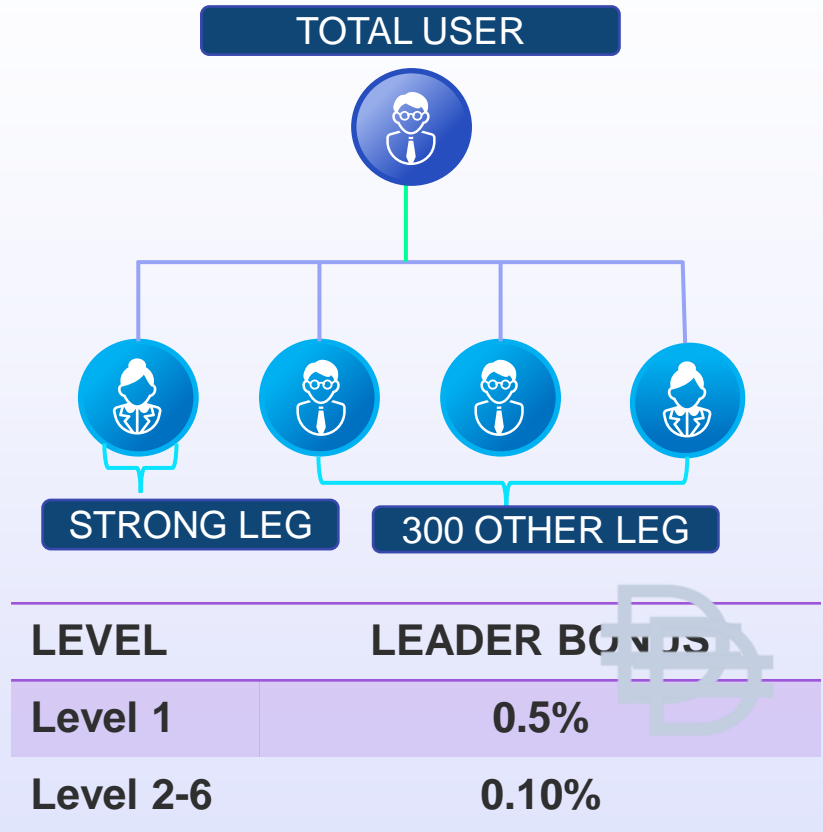

Leader Bonus

TOTAL TEAM - STRONG LEG = OTHER LEGS 300 TEAM

The Leader Bonus presents a substantial opportunity to earn income from the depth of your team, spanning up to 150 levels. This bonus is distributed across all networks.

When your team members qualify for the Team Leader Bonus, you advance to the next level. You receive second-level income from their team, and for another team, you earn first-level income. This progression continues across all your teams, pushing your generation levels upward
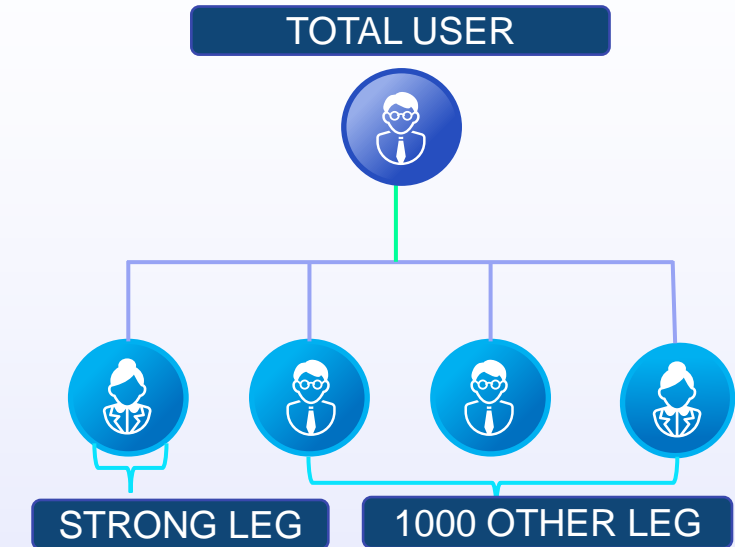

This bonus is **not counted** towards the **limit** and is **always earned** if you qualify.

LEVEL	LEADER BONUS
Level 1	0.5%
Level 2-6	0.10%

Development Bonus

TOTAL TEAM - STRONG LEG = OTHER LEGS 1000 TEAM

The Team Development Bonus provides a great chance to earn from your team's growth, covering **up to 150 levels.** This bonus is shared across all your networks. As your team members qualify, you move up to the next level, earning from their team's efforts. This process continues, helping your overall income increase as your team expands.

TOTAL USER

STRONG LEG

1000 OTHER LEG

LEVEL	DEVELOPMENT BONUS
Level 1	0.25%
Level 2	0.15%
Level 3	0.10%

This bonus is **not counted** towards the **limit** and is **always earned** if you qualify.

Upcoming Projects

In-out

Community Rewarding

Empowering our community with reward programs for active participation, referrals, and ecosystem growth. Your engagement earns you more

Crypto Exchange

Developing a decentralized exchange (DEX) with low fees, high-speed transactions, and strong security for global crypto trading

Utility

Creating real-world use cases for the INOUT token, ensuring it's not just a digital asset but a part of your daily life—payments, services, and more

Arbitrage

Leveraging smart arbitrage strategies to maximize profits by exploiting price differences across multiple platforms in real-time

Blockchain

Building a robust, secure, and scalable blockchain network to support seamless transactions with transparency and efficiency

Team & Conditions

Order Growth & Team Growth Structure:

✓ **2X Limit Appreciation** – Your **Order Growth** and **Team Growth** will scale up to **2X of your deposit**.

✓ **3X Earnings Limit** – Your total earning potential is **3X of your active orders**.

✓ **Order Maturity** – All orders are marked **inactive after 15 days**.

Principal Withdrawal Guidelines:

✓ **Maturity Rule:** To **unlock the old order**, new order has to be placed **after 10 days from the old order** .

✓ **Sustainability:** This cycle ensures a **healthy and balanced ecosystem**.

In-Out token Buy:

You can **buy the In-out token** as per your **last order value.**

Instant Cash in Hand :

Get a 10% Team Growth Bonus when you deposit into a **new wallet!**

Important Notes:

✓ If your **earning limit reaches zero**, all **Direct, Level & Team Growth Wallet** collections will lapse. Your **Team Growth** will also **stop accumulating**.

✓ **Leader & Development Bonuses** remain **active** and **are not affected by your limit**.

Withdrawal Details:

✓ **$10** (**multiples of $10**, no max limit).

✓ **Profit Withdrawal**: **Fee**: **10% deduction on profit withdrawals** only.

   Payout Structure:
   1. **Principal Amount** → Paid in **INOUT Tokens**
   2. **Profit Amount** → Paid in **DAI (Stable Cryptocurrency)**
